Select Technology is the preferred global stocking distributor, leading the way by providing a full service solution for your component needs. Our goal is to be your long term **partner** through the **entire supply chain cycle**, from initial demand through final **asset recovery**. Whatever your needs are, whenever your needs are, we are there. Our highly trained staff make themselves available to our partners 24/7.

In this industry, **experience** is everything. Our strength lies in the history and experience of all our employees. The account managers at Select average over 10 years experience in the electronic distribution industry, making them the most **qualified** staff in the industry. This experience and **knowledge** allow us to offer faster response times and genuine spot market intelligence.

Our exposure to millions of dollars of excess inventory from Fortune 500 companies enables us to create opportunities to offer **positive PPV's** and continuing price savings to our customers. When you are faced with a shortage, our extensive on-site inventory, global sourcing partnerships and **long term relationships** with vendors worldwide help you to get **reliable**, quality parts in addition to on-time delivery. Our custom inventory solutions provide an array of services, from inventory analysis, forecast consulting, same day liquidation of your entire inventory, to **individually tailored** consignment programs. Meeting your objectives is our goal.

When you partner with Select, you benefit from full **visibility** through the entire supply chain. Whether you need to track incoming orders, or get real time access to your consigned inventory, we offer full visibility through our **dedicated** customer services web portal.

Being **ISO 9001:2000 certified**, quality is apparent in everything we do. From the service you receive, to the parts that we deliver, quality is inherent. Selects' warehouse is fully ESD & MSD IPC/JEDEC J-STD-033A compliant. Our incoming QC inspection team averages 20 years experience in electronic component inspection. You can be sure your components are handled **accurately**, properly and inspected with meticulous attention to detail and manufacturer specifications.

So take the test, check **Select**, and take advantage of the benefits that our partners already enjoy. Speed, reliability, experience, and honesty will make Select your only choice.
